## Department of Chemical Pathology

Reporting Time: 11-Feb-2023 16:43

### Glycosylated Hemoglobin (HbA1C)

**Interpretation:** According to guidelines of the American Diabetes Association (ADA) patients already diagnosed with Diabetes Mellitus should monitor HbA1c level as an indicator of glycemic control over the previous 3 months time. The optimum HbA1c level is based on the health status of the individual. In conditions associated with an altered relationship between A1C & glycemia, such as hemoglobinopathies including sickle cell disease, pregnancy (second, third trimesters & the postpartum period), glucose-6-phosphate dehydrogenase deficiency, HIV, haemodialysis, recent blood loss, transfusion or erythropoietin therapy, only plasma blood glucose criteria should be used to diagnose diabetes.

### Lipid Profile

#### Serum Total Cholesterol

Cholesterol is essential substance for human body at normal levels. High cholesterol can block blood vessels and can increase the risk of heart disease or a stroke.

#### Serum Triglycerides

Triglycerides are fats that are a flexible source of energy. High triglyceride levels can be treated by following a lower calorie diet, taking regular exercise and medication prescribed by physician.

#### Serum HDL-Cholesterol

HDL Cholesterol is known as the "Good" cholesterol because it helps to remove other forms of cholesterol from bloodstream and associated with a lower risk of heart disease.

## Serum LDL-Cholesterol

LDL-Cholesterol is known as "Bad" Cholesterol because its high levels lead to accumulate in the blood vessels.

**182** mg/dL  
High

■ Desirable (<100) ■ Above Desirable (100 - 129) ■ Borderline High (130 - 159) ■ High (160 - 189) ■ Very High (≥190)

## Serum Non-HDL Cholesterol

Non-HDL Cholesterol is the difference between Total and HDL Cholesterol thus, represents Cholesterol carried on all of the potentially proatherogenic Apo-B containing particles (primarily LDL-Cholesterol, IDL-Cholesterol, and VLDL-Cholesterol) as well as Chylomicron remnants and Lipoprotein(a).

**200** mg/dL  
High

■ Desirable (<129) ■ Above Desirable (130 - 159) ■ Borderline High (160 - 189) ■ High (190 - 219) ■ Very High (≥220)

## Renal Function Tests

### Serum Urea

**31** mg/dL  
Normal

■ Low (<10) ■ Normal (10 - 50) ■ High (>50)

### Serum BUN

**15** mg/dL  
Normal

■ Low (<8) ■ Normal (8 - 22) ■ High (>22)

### Serum Creatinine

**0.82** mg/dL  
Normal

■ Low (<0.73) ■ Normal (0.73 - 1.18) ■ High (>1.18)

**Note:** Change in reference values is effective from 7 June 2022.
